MANYA RUHELA

Ghaziabad, India | +91-9711348863 | manyaruhela2005@gmail.com | LinkedIn | GitHub

Profile

B.Tech CSE (AI & ML) undergraduate (CGPA 9.58) with hands-on experience in end-to-end ML pipelines, real-time computer vision, and full-stack development with Python, Node.js, PHP, and MySQL. Strong interest in applying AI/ML to real-time, high-stakes detection and decision-support systems.

Education

SRM Institute of Science & Technology 2024–2028
B.Tech CSE — Artificial Intelligence & Machine Learning *CGPA: 9.58*

Holy Child School Class XII: 79.25% | Class X: 96.4%

Experience

Full Stack Developer & Volunteer 15 Jun 2026 – 15 Jul 2026
Bharat Puria Shiksha Samiti (Gharonda Bal Shishu), Ghaziabad

- Supported students through academic activities, assessments, and creative/extracurricular work while engaging directly with them.
- Identified their academic tracking needs and built a technology-based solution to improve how student information and performance were managed.

GenAI Powered Data Analytics Job Simulation Mar 2026
TATA × Forage

- Completed a business-focused analytics simulation covering AI strategy, exploratory analysis, and predictive analytics, including model selection, validation, and data interpretation.

Projects

Central Banking Management System (CBMS) *PHP, MySQL, phpMyAdmin*

- Full-stack banking management platform built with PHP and MySQL for managing accounts, transactions, KYC, loans and role-based operations.

RecoverX *React.js, Tailwind CSS, Node.js, Python, FastAPI, OR-Tools, Scikit-learn*

- Optimization-based delivery recovery system that evaluates reassign, reschedule, and reroute options against rider availability, capacity, and customer time windows, and returns explainable recommendations.

Border Surveillance & Intrusion Detection (SIH) *Python, OpenCV, Docker*

- Computer-vision system for perimeter monitoring: human and vehicle detection and tracking, face detection with ANPR, and a virtual fence. Adds night-movement detection, real-time alerts, event logging, and risk scoring.

Student Management System *Python, Flask, Tkinter, MySQL*

- Student information system with web (Flask) and desktop (Tkinter) versions, tracking profiles, attendance, grades, and notes. The web app adds daily check-ins, lesson logs, and progress graphs.

Space Object Detection System *Python, YOLOv8, DINOv2, OpenCV*

- Real-time detection and classification on high-resolution multi-source imagery with 92% detection accuracy. Evaluated with mAP, precision, and recall to reduce false positives.

Skills

- **Languages:** Python, C++ (DSA), JavaScript, PHP, SQL
- **Frontend:** HTML5, CSS3, JavaScript, Responsive Design, Tkinter
- **Backend:** Node.js, Python, Flask, PHP, REST APIs
- **Databases:** MySQL, SQL, phpMyAdmin
- **AI / ML:** OpenCV, YOLOv8, MediaPipe, DINOv2, Scikit-learn, NLTK, NumPy, Pandas, Matplotlib, Seaborn
- **DevOps & Cloud:** Docker, AWS, Git, GitHub
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

Achievements & Certifications

- Top 20 Teams — Smart India Hackathon 2025 (Inter-College Level)
- Udemy: The AI Engineer Course 2026
- Udemy: Mastering Python OpenCV with Real-World Projects
- GUVI (HCL): Data Science Fundamentals Workshop
- HackerRank: Python (Basics)
